

3D Floating Foam Ship

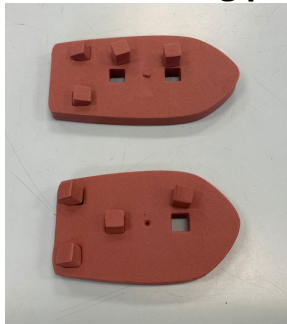

1

Each kit contains:
Foam ship pieces, black flagpole,
red flag, white sail, foam stickers

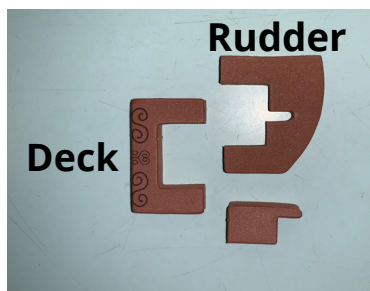

2

Push out and remove the squares
from the holes in the upper and
lower ship pieces. Remove the plugs
from the center flag pole holes.

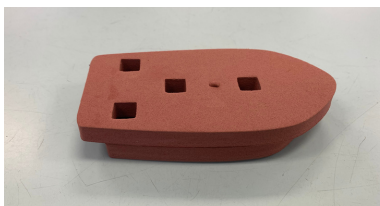

3

Carefully separate rudder and deck.

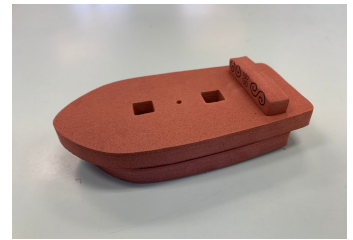

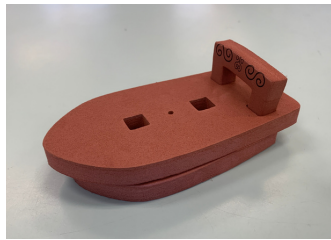

4

Stack the bigger ship piece on the
smaller. Line up the square holes.

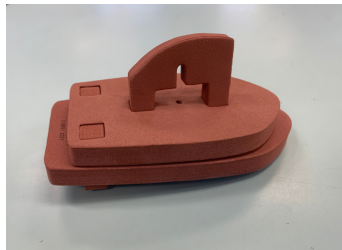

5

Insert deck into the back square holes.
Push deck through upper and lower
ship pieces.

6

Flip over and insert rudder into the
square holes. The squared off end is
toward the front pointy side of the ship.
Push the rudder completely through the
top and bottom pieces.

7

Poke out the holes on the flag and sail.
Feed the flag and sail through the black
flagpole. Push the flagpole through the
center hole in the ship.

8

Decorate your ship with the yellow
stickers. Try floating your ship in water.
